**ST-FRM**

**FABRIC RELAXING MACHINE (CONVEYOR TYPE)**

**ST-FRM** is mainly used to eliminate the tension of knitted fabrics; besides, it will keep fabric tidy for storage. With the increasing use of elastomeric and lycra fabrics in all sectors of apparel and textiles industries, **ST-FRM** is becoming popular and it can work with spreading machine for good efficiency.

**Features:**
- Simple fabric input control.
- Fabric input from free running or motor driven rollers for simple and effective control.
- Roller conveyors for synchronization unrolling & placing.
- End of roll automatic stop sensor for next roll joining.
- Build-in inspection function (optional).

**Technical Specifications:**

<table>
<thead>
<tr>
<th>Model</th>
<th>ST-FRM</th>
</tr>
</thead>
<tbody>
<tr>
<td>Speed</td>
<td>&gt;300m/min</td>
</tr>
<tr>
<td>Fabric width</td>
<td>1.5-3.0 meters</td>
</tr>
<tr>
<td>Standard roll diameter</td>
<td>500mm</td>
</tr>
<tr>
<td>Weight</td>
<td>80kg (for model <strong>ST-FRM-280</strong> only)</td>
</tr>
<tr>
<td>Electric power</td>
<td>3Phase-380V 50Hz (can be adjusted to suit different countries)</td>
</tr>
<tr>
<td>Remark</td>
<td>Easy-to-work with sophisticated and can be tailored-made to suit requirements of processing needs</td>
</tr>
</tbody>
</table>

**ST-FRM-S**

**FABRIC RELAXING MACHINE (STEAM TYPE)**

**ST-FRM-S** is a combined with inspection & rolling function. It can relax fabric in 8-10 hours.

- Speed: 0-40cm/min
- Fabric Width: 1.8-4m
- Standard Roll Diameter: 500mm
- Fabric Relaxing Function: Roll-to-Roll fabric relaxation
- Fabric Inspection Function: Plaited Fabric to Roll

---

**ST-FRM-G**

**FABRIC RELAXING MACHINE (FOR GARMENT FACTORIES)**

**ST-FRM-G** is designed for garment factories with its advanced technology and efficiency.

- Speed: 0-60m/min
- Fabric Width: 1.8-4m
- Standard Roll Diameter: 300mm
