

ST-HBT-11 HYDRAULIC A-FRAME LIFTING TROLLEY

The hydraulic A-frame lifting trolley is small, robust and powerful. Due to its loading capacity of 5000kgs, the trolley can transport A-frame weighing up to 5000kgs. The spherical head diameter and the lifting range of the spherical head can be adapted to the individual requirements.

Features:

- 1). High loading capacity.
- 2). Large, smoothly running PU wheels directly under the load. Thus, the vehicle can easily turn on the spot.
- 3). Robust hydraulic system.

Technical Specifications:

Carrying Capacity:	3000kgs/5000kgs
Hydraulic Cylinders:	One
Hydraulic Unit:	One
Lifting Height:	300mm

ST-MBT-11 MOTORIZED A-FRAME TRACTOR

The motorized A-frame tractor can lift and tow batch trolleys A-frames up to 5000kgs. It is equipped with a collision protection device on the driving part and behind the running wheels, since it is often used under rough conditions. The lifting range of the spherical head and the spherical head diameter can be tailor-made to suit the individual customer's requirements.

Features:

- 1). Large steering angle.
- 2). Collision protection.
- 3). High battery capacity for a long service time.
- 4). DC control for optimal energy utilization.

Technical Specifications:

Max. Carrying Capacity:	3000kgs/5000kgs
Lifting / Driving:	Two Motors
Battery:	24V/210Ah (240Ah)
Lifting Height:	300-350mm
